WHO WE ARE

We are a trusted technology partner of many leading enterprises in the public & private sectors of Saudi Arabia and the GCC region. We believe in delivering innovative IT solutions and reliable services that help organizations by streamlining operations and boosting innovation, while reducing complexity, risk and cost. Our group of highly skilled experts team up dynamically to tailor complex solutions and deliver them in simple, reliable, and cost-effective ways.

We are SSBS, one of fifteen leading business endeavors established by Al-Othman family since 1967, including Nada Dairy and Kempinski Al Othman Hotel. Our services will help you:

- Streamline & Optimize Operations
- Boost Business Innovation
- Reduce Risk
- Untangle IT Complexity
- Reduce Cost

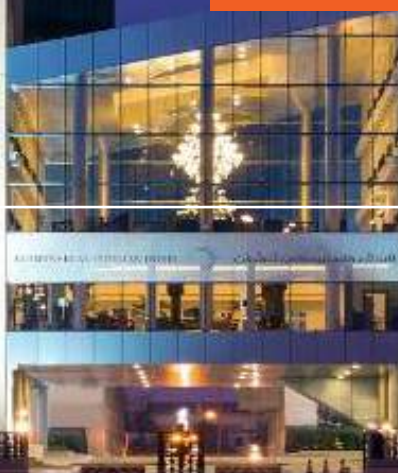

If you've got the
time, We've got the
technology.

DELIVERING INNOVATIVE SOLUTIONS

Impartial advice can be hard to come by, especially ones tailored to fit your specific needs & potential. Our dedicated expertise remains at the forefront of IT advancements. We understand the challenges, opportunities and trends of your industry - along with local/regional regulatory compliance requirements.

We leverage economies of scale and rely on dedicated IT experts to provide you headache-free access to the most current hardware, software and technical expertise, at a cost that is lower than that of running a similar operation inhouse.

WHAT WE DO

TRACKING

BUSINESS SOLUTIONS

When shifting your business-critical operations to a dynamic mobile environment you'll need help to migrate and manage your fleet of mobile devices and their complex apps and lifecycles. We customize, deploy and manage a range of best-in-class 3rd party mobility solutions that best fit your need. Our team of highly skilled IT experts ensures that your mission-critical applications are constantly monitored and maintained.

INFRASTRUCTURE & NETWORKS

We design, implement and manage IT infrastructure that is reliable, resilient and scalable. Our approach enables better integration with your existing processes, while allowing for the adoption of technological innovation. We help optimize your network and centralize its services to improved operations and streamlined workflow processes.

MANAGED CLOUD

We help develop your holistic migration and scaling strategy with security, reliability and dexterity at its core. We tailor our managed cloud service offerings to suit your needs whether through a private, public or hybrid cloud set-up. You can continue to rely on us post implementation to manage your cloud, optimize it, and provide you with ongoing support.

Many enterprises that have already adopted SaaS continue to struggle with API and integration while juggling several disjointed cloud-based applications.

MANAGED SaaS

Consolidation, customization and scalability are the main reasons why clients rely on us to get it right from the onset. Through our managed SaaS arrangement, we work with you to design and implement an integration and deployment strategy. We also provide the technical expertise, consistent service, and vendor management needed to help you make the most of your new setup. This way you can reap the full benefits without the need to dedicate IT professionals and build their deep expertise needed to run and maintain many complex systems.

MANAGED SECURITY

We can liberate you from technical challenges by offloading security & compliance management to the level that best suits your needs. From Managed SOC and SIEM 24/7 to IDS and periodic PEN tests, we help you manage vulnerability and keep your systems and devices patched, secure and compliant.

TRACKING

While many IT solutions deliver much-needed incremental improvements, tracking technology is a gamechanger that can bring about a quantum leap in efficiency, productivity and security.

From logistics and transportation to healthcare and Oil & Gas, enterprises are relying on our tracking services and solutions to disrupt their industries. Our vehicle connectivity solutions are helping clients optimize route efficiency, increase fleet utilization, and improve security of employees and cargo. Through our RIFD solutions logistics companies are streamlining warehouse and inventory management. In the healthcare sector we are leveraging our industry expertise to design and implement bespoke solutions for better patient monitoring and smarter medicine dispensing systems.

THE WHOLE MIX

When aiming high you'd want to rely on a partner who has more than just the right solutions and services. Our parent company Al-Othman Holding calls this equation the "whole mix", because it goes beyond the core offering to include all the right elements required for success – top talent, industry insight, strong partnerships, ethical values, and investor support. It also means we'll be with you the whole way, throughout each project's entire lifecycle, and well beyond.
